PROFESSIONAL SUMMARY

Innovative Automation Test Engineer with 5 years and 7 months of specialized expertise in UI/API automation and nearly 9 years of total professional experience. Successfully transitioned from manual testing workflows to engineering scalable, automation-heavy frameworks (Playwright) and optimizing CI/CD pipelines. Proven track record of accelerating feature delivery and improving software quality through robust, AI-driven test automation and Agile methodologies.

TECHNICAL SKILLS

- **Automation Tools:** Playwright, Selenium, Postman, TestGrid, Jira, BrowserFlow, AIO Test, n8n.
- **Languages & Frameworks:** JavaScript, Java, SQL, HTML, XPath, Node.js.
- **CI/CD & Cloud:** Jenkins, Azure DevOps, AWS (EC2).
- **Design & Content:** Adobe InDesign, Adobe Photoshop, Proofreading.

NOTABLE ACHIEVEMENTS

- **Torch Bearer Award (Mar 2025, May 2023):** Earned recognition for delivering exceptional software quality and streamlining testing processes.
- **Flash Forward Award (Aug 2024):** Secured this award by engineering innovative test automation solutions that significantly reduced execution time.

WORK EXPERIENCE

Exeter Premedia Services — Chennai, Tamil Nadu, India
Automation Test Engineer — Apr 2023 – Present

- Built a scalable Playwright JS framework from scratch, increasing regression coverage by 60% for core publishing platforms.
- Optimized CI/CD pipelines in Jenkins by designing logic that ensures commands execute sequentially using absolute paths, preventing build failures.
- Maintained AWS EC2 servers for continuous and seamless automated test execution.
- Validated ServiceNow Incident APIs using Postman, delivering detailed reports for stakeholder reviews.
- Led test strategy execution, mentored junior engineers, and conducted rigorous PR reviews to improve Agile QA workflows.

Software Test Engineer 1 — Mar 2021 – Mar 2023

- Executed manual and automated tests, developed detailed test cases, and conducted thorough regression testing for system enhancements, reducing defect leakage by 15%.

Associate Copyeditor 1 — Feb 2020 – Feb 2021

- Streamlined content delivery by refining documentation and applying styling standards using Adobe InDesign and Photoshop, improving formatting efficiency by 20%.

Production Executive — Nov 2018 – Jan 2020

- Coordinated digital production workflows, leveraging HTML and proofreading skills to finalize media formatting with 100% adherence to publishing guidelines.

PROJECTS

TestGrid (QA Management Web Application) *Full-Stack Developer*

- Engineered front-end and back-end architecture for an internal QA management web application focusing on test case authoring, manual run execution, defect tracking, and CI pipeline result ingestion.
- Centralized the QA workflow by replacing spreadsheets and Jira comments, streamlining reporting processes across teams.

Worship Connect (Media Presentation Web Application) *Full-Stack Developer*

- Developed custom media presentation web software specifically designed to streamline live event and church media management.
- Integrated AI tech automation into the development lifecycle to optimize formatting and accelerate feature delivery.

Mobile Applications: Birthday Reminder & Bottle Shoot *Mobile App Developer*

- Built and deployed ”Birthday Reminder”, a Flutter-based mobile application currently in closed testing, to streamline personal event tracking and automated notifications.
- Developed ”Bottle Shoot”, an interactive mobile gaming application, handling end-to-end delivery and publication maintenance via the Google Play Console.

DC Print (Windows Desktop Application) *Desktop App Developer*

- Engineered a Windows-compatible desktop setup utility tailored to automate delivery challan processing for commercial clients.
- Optimized local data handling to ensure fast, reliable printing workflows and accurate document generation.

Kriyadocs (Publishing Automation Platform) *Automation QA*

- Designed and implemented a robust Playwright JS automation framework from scratch for an enterprise e-publishing web application.
- Authored high-priority P0 test scripts, significantly decreasing manual regression testing hours and improving overall release confidence.

ServiceNow Incident API Testing *Automation QA*

- Developed and executed comprehensive REST API automated test scripts using Postman to validate critical incident management workflows.
- Delivered reliable API validations that improved back-end system integration stability and reduced production defects.

Leaftaps CRM Automation *Automation QA*

- Authored robust Selenium Java automated test scripts leveraging the Page Object Model (POM) design pattern.
- Enhanced script maintainability and accelerated automated test execution across multiple testing environments.

EDUCATION

Master of Computer Applications (MCA) Expected 2027
SRM Institute of Science and Technology, Chennai, India.

CERTIFICATIONS

- Playwright JS Automation (Udemy).
- Selenium WebDriver (Testleaf).
- CI/CD with Jenkins & Docker (Udemy).
- MySQL (GUVI).
- Participation in AI for India Event conducted by GUVI.
